

Life Chronicle — Full Build Reference

Every subsection, Overview to Settings — fields, storage, and what it offers once finished

OVERVIEW (top of admin dashboard)

Item	Database	Fields	What it offers once built
Visitors today	(none — needs Vercel Analytics)	—	Real-time visitor count for that day
Most viewed section	(none — needs Vercel Analytics)	—	Shows which of the 8 groups gets the most traffic
New comments	<code>comments</code>	count where <code>status='pending'</code>	Quick glance at unread comments waiting for you
Active polls	<code>polls</code>	count where <code>is_active=true</code>	Quick glance at how many feed polls are currently live
Recent activity feed	<code>activity_log</code>	<code>category</code> , <code>message</code> , <code>created_at</code>	Live feed of your own actions — "New project added," "Photo added," "Project marked featured" — fills itself automatically

GO — HERO

Subsection	Database	Fields	What it offers once built
Avatar / profile photo	<code>profile</code> + <code>avatars</code> bucket	<code>avatar_url</code>	Upload a photo once → it appears as your circular hero photo on the live site instantly
Resume / CV	<code>profile</code> + <code>resume</code> bucket	<code>resume_url</code>	Upload a PDF → the "Download Resume" button on your site always serves the latest file

Subsection	Database	Fields	What it offers once built
Main tagline	profile	headline_1, headline_2	The big bold animated headline text under your name
Sub tagline	profile	subtitle	The smaller supporting line below the headline
Location	profile	location	Shown next to the live "online" status indicator
Skill chips	skill_chips	label, emoji, sort_order	Add/remove/drag-reorder scrolling tag pills (e.g. "📊 Excel / Power BI")
Primary CTA button	profile	cta_primary_label	Edit the text on your main hero button (default: "Download Resume")
Secondary CTA button	profile	cta_secondary_label	Edit the text on your second hero button (default: "Explore the chronicles")

G1 — HELLO, IT'S ME

Subsection	Database	Fields	What it offers once built
Honest bio	profile	bio_main	A free-text paragraph block — your "unfiltered manual"
Beliefs I'd die on	belief_items	content, sort_order	Add/remove/reorder a list of short belief statements
Currently obsessed with	profile	obsessed_with	A single editable line, quick to update often
Random facts that define me	random_facts	content, sort_order	Add/remove/reorder a list of quirky facts

Subsection	Database	Fields	What it offers once built
Data storytelling	projects ((category='storytelling'))	title, description, content, image_url, link_url, featured, sort_order	Cards with screenshot + title + short blurb + clickable link
Code & problem solving	projects ((category='code'))	same fields as above	Same card format, filtered to this category
Brain dumps (essays)	projects ((category='essay'))	same fields, can use content for the full write-up	Either link out, or (if decided later) open the full essay on-site
Side quests	projects ((category='sidequest'))	same fields as above	Same card format, filtered to this category
(Image uploads go to)	project-images bucket	—	One cover image per project

G3 — QUESTS & ADVENTURES

Subsection	Database	Fields	What it offers once built
Expeditions — map pins	expeditions	place_name, latitude, longitude, visited_date, cover_photo_url, sort_order	An interactive map with a pin for every place you've been

Subsection	Database	Fields	What it offers once built
Quest chronicles — deep stories	quest_chronicles	title, content, cover_photo_url, expedition_id (optional link), published_at	Long-form travel stories, optionally tied to a specific pin
Through my adventurer's eyes — photos	adventure_photos + travel-photos bucket	photo_url, caption, expedition_id (optional)	A travel photo gallery
Bucket list: unwritten quests	bucket_list	item, status (planned/done), sort_order	A checklist visitors can see — planned vs. completed
Moments that made me wander	quest_chronicles (shared table)	same as Quest chronicles	Just more story entries, same mechanism

G4 — STUFF THAT SHAPED MY BRAIN

Subsection	Database	Fields	What it offers once built
Books that broke me open	influences (type='book')	title, creator (author), note, url, image_url (cover), sort_order	Book cover + title + author + your note
Songs that get it	influences (type='song')	title, creator (artist), note, url, image_url (album art)	Album art + song/artist + your note + listen link
People who made me think	influences (type='person')	title (name), creator (their role), note, image_url (photo)	Photo + name + role + why they matter
The internet thinks I should know	influences (type='link')	title, note, url	A simple link card with your note

G5 — BRAIN CHAOS FEED (*busiest group — 14 subsections*)

Subsection	Database	Fields	What it offers once built
Poems I'm obsessed with	<code>feed_posts</code> (<code>(type='poem')</code>)	<code>content</code> , <code>posted_at</code>	A poem posted in the feed stream
On repeat — song + rant	<code>feed_posts</code> (<code>(type='on_repeat')</code>)	<code>subtitle</code> (song), <code>content</code> (rant), <code>media_url</code> (song link)	A post showing what you're playing on loop + why
Hot takes & unpopular opinions	<code>feed_posts</code> (<code>(type='hot_take')</code>)	<code>content</code>	A short opinion post
This week's brain dump	<code>feed_posts</code> (<code>(type='weekly_dump')</code>)	<code>content</code>	A weekly free-write post
Sayings that stuck	<code>feed_posts</code> (<code>(type='saying')</code>)	<code>content</code>	A short quote/saying post
Creative chaos — sketches/fragments	<code>feed_posts</code> (<code>(type='creative_chaos')</code>) + <code>media_url</code>	<code>content</code> , <code>media_url</code> (image)	A post that can include sketch/image fragment
Currently vibing with	<code>feed_posts</code> (<code>(type='vibing_with')</code>)	<code>subtitle</code> , <code>content</code>	A short "what I'm into right now" post
If I was in a mood — playlist	<code>feed_posts</code> (<code>(type='mood_playlist')</code>)	<code>subtitle</code> (playlist name), <code>media_url</code> (link)	A mood-based playlist share

Subsection	Database	Fields	What it offers once built
Quick fire questions	<code>polls</code> + <code>poll_options</code> <code>((type='quickfire'))</code>	<code>question</code> , multiple <code>option_text</code> + <code>vote_count</code>	A poll visitors can vote on
OVERRATED or underrated	<code>polls</code> + <code>poll_options</code> <code>((type='overrated_underrated'))</code>	same as above	Same poll mechanism
Guess what I'm thinking	<code>polls</code> + <code>poll_options</code> <code>((type='guess_thinking'))</code>	same as above	Same poll mechanism
Caption this — photo contest	<code>polls</code> <code>((type='caption_contest'))</code> + <code>image_url</code>	<code>question</code> , <code>image_url</code> , options = submitted captions	Visitors submit/vote on caption for a photo you post
Would you rather	<code>polls</code> + <code>poll_options</code> <code>((type='would_you_rather'))</code>	same as above	Same poll mechanism
This inspired me — submissions	<code>submissions</code>	<code>content</code> , <code>submitter_name</code> , <code>status</code> (pending/approved/rejected)	Visitors submit something that inspires them → you approve before it shows publicly

G6 — ACHIEVEMENTS & LEVELING UP

Subsection	Database	Fields	What it offers once built
Proof I'm winning —	<code>achievements</code> <code>((type='career_milestone'))</code>	<code>title</code> , <code>description</code> , <code>date</code>	A timeline entry for career wins

Subsection	Database	Fields	What it offers once built
career milestones		<code>issuer</code> (company, optional)	
Leveled up — certifications	<code>achievements</code> <code>((type= 'certification'))</code>	<code>title</code> , <code>description</code> , <code>date</code> , <code>issuer</code> , <code>image_url</code> (badge)	A certificate entry with issuing body + badge image
Wins & lessons	<code>achievements</code> <code>((type= 'win_lesson'))</code>	<code>title</code> , <code>description</code> , <code>date</code>	A reflective write-up entry
Hall of fame moments	<code>achievements</code> <code>((type= 'hall_of_fame'))</code>	<code>title</code> , <code>description</code> , <code>date</code>	A standout-moment entry

G7 — UNFILTERED LIFE

Subsection	Database	Fields	What it offers once built
Photo diary (raw & real)	<code>life_photos</code> + <code>life-photos</code> bucket	<code>photo_url</code> , <code>caption</code> , <code>sort_order</code>	A casual photo grid
Where I've lived & why — map	<code>places_lived</code>	<code>place_name</code> , <code>latitude</code> , <code>longitude</code> , <code>years</code> , <code>why</code> , <code>sort_order</code>	A map of everywhere you've lived, with your notes on why
My rituals	<code>rituals</code>	<code>content</code> (single block)	One editable paragraph about your daily/weekly rituals
Random snapshots	<code>life_photos</code> (shared table)	same as Photo diary	Just more photos in the same grid

G8 — LET'S CONNECT

Subsection	Database	Fields	What it offers once built
Stalk me productively — social links	<code>social_links</code>	<code>label</code> , <code>url</code> , <code>icon</code> , <code>sort_order</code>	Your list of clickable social/contact icons
What's on your mind — comments	<code>comments</code>	<code>content</code> , <code>author_name</code> , <code>status</code> (pending/approved)	Visitors leave comments → you moderate → approved ones go public
Your stories about me — testimonials	<code>testimonials</code>	<code>content</code> , <code>author_name</code> , <code>status</code>	Same moderation flow, for testimonials
Let's build something — collab form	<code>collab_requests</code>	<code>name</code> , <code>email</code> , <code>message</code> , <code>status</code> (new/read/archived)	A private inbox — only you see these, never public
Ask me anything — Q&A	<code>qa_questions</code>	<code>question</code> , <code>answer</code> , <code>status</code> (pending/answered)	Visitors ask → you answer → goes public once answered
Your turn — viewer spotlight	<code>spotlight_submissions</code>	<code>content</code> , <code>author_name</code> , <code>status</code> (pending/featured)	Visitors submit → you feature the best ones publicly

SETTINGS

Subsection	Database	Fields	What it offers once built
Email & username	Supabase Auth	—	Built-in login system, not a custom table
Login password	Supabase Auth	—	Built-in
Two-factor authentication	Supabase Auth	—	Built-in, extra login security

Subsection	Database	Fields	What it offers once built
Active sessions & devices	Supabase Auth	—	Built-in, see/revoke logged-in devices
Log out	Supabase Auth	—	Built-in
Site title & tagline	<code>site_settings</code>	<code>site_title</code> , <code>site_tagline</code>	Controls your browser tab title / meta info
Default theme	<code>site_settings</code>	<code>theme</code> (light/dark)	Sets which theme loads by default for visitors
Accent color	<code>site_settings</code>	<code>accent_color</code>	Changes the mint-green accent across the whole site
Maintenance mode	<code>site_settings</code>	<code>maintenance_mode</code> (true/false)	Temporarily shows a "down for maintenance" page to visitors
Export all content	(not built yet)	—	Planned feature: download all your data as a backup file
Site analytics & storage usage	(not built yet — <i>Vercel Analytics</i>)	—	Planned: real traffic + storage usage stats

TOP BAR (always visible, every page)

Item	Database	Fields	What it offers once built
View site button	—	—	One click from admin straight to your live public site
Theme toggle	<code>site_settings</code>	<code>theme</code>	Switches admin dashboard's own light/dark mode, remembers your choice
Notification bell	<code>notifications</code>	<code>type</code> , <code>message</code> , <code>is_read</code>	Auto-fills when a visitor comments, asks a question, requests a collab, or submits a testimonial/spotlight entry

Quick totals

- **31 database tables** in total (25 core + `notifications` + `activity_log` + patched fields across `influences`, `projects`, `feed_posts`, `achievements`)
- **6 storage buckets:** `avatars`, `resume`, `project-images`, `travel-photos`, `life-photos`
- **51 subsections** across G0-G8, matching the "51 subsections" label already built into your Admin.html sidebar
- **3 features intentionally not database-backed yet:** real visitor analytics, content export, and "most viewed section" — all planned for later phases
